

The owners and staff of Stainless Outfitters have had a long association with the Hinterhoeller organization, ever since the first Niagara 35 rolled off the line in 1978. Since that time we have been the proud suppliers of quality stainless steel pulpits, stern rails, ladders, stanchions and other stainless equipment on all of the Hinterhoeller yachts including the entire Nonsuch line of boats.

We maintain specs for all of the above items and more recently we have developed what our customers consider to be the best add-on of all... our stainless and starboard swim platform with hidden telescoping ladder for all Nonsuch models.

We are also pleased to announce that we keep full specifications for all tankage including water, waste and fuel for all Hinterhoeller models and we are able to produce these tanks in either 304 or 316 stainless steel using our precision 6'x12' waterjet.

***Your enquiries are always welcome.***
